Who Can Benefit
RISE is designed for teens ages 13-18 (Grades 8-12) who have suicidal thoughts/behaviors, recently attempted suicide, and/or repetitively engage in self-harm behaviors.

I finally have hope.
—RISE graduate

Goals of the RISE Program
• Reduce suicidal thoughts and behaviors
• Reduce self-harm behaviors (e.g., cutting)
• Improve ability to regulate emotions and cope with stress
• Improve important areas of life such as school, home, friendships and family relationships
• Reduce the need for higher level of care
• Help teens build a life worth living

Dialectical Behavior Therapy (DBT) is currently the only well-established, evidence-based treatment for decreasing suicidal feelings or self-harming behaviors in youth.
—Dr. Michele Berk
Director of DBT Programming at RISE

About the Experts
Catherine T. Harvey Center for CLINICAL SERVICES
Comprehensive and integrated services for learning differences and mental health for children, teens and young adults.
